

The New Cameron Stadium

Bangor, Maine

G.L. Frost Architecture has been working with the City of Bangor's School Department to develop the future of Cameron Stadium. The new Grandstand plan includes four full locker rooms with separate training rooms and coach's rooms. It will have concessions on the upper level and a new press box with elevator access.

The field will be a new field turf surface that will accommodate use by football, soccer and field hockey. The visitors seating will be raised with room for concessions and storage below. The new facility will be accessible for all fans.
